CM0377 2001/2002 — non-examinable sections of module

In order that we might finish the module on time (hopefully!), the following parts are not being covered in detail, and are not examinable:

- Lecture 11, slides 15 to 21 and the associated program *fwd.pl.*
- Lecture 11a in its entirety.

Please note that if for some reason you have to sit or re-sit the examination in 2003 or later, the above topics are likely to be examinable once more. If you are unfortunate enough to find yourself in this position, you would be well advised to attend the lectures next year in which I cover the topics that I have declared non-examinable for the present year.
