

CM3106 Mid Module Feedback 2015/16

Prof David Marshall

dave.marshall@cs.cardiff.ac.uk

School of Computer Science & Informatics
Cardiff University, UK

What you LIKE about the module

9 out of 17 returns

- “Challenging”,
- “Interesting and informative”
- “Excellent notes/sheets/labs”
- “Interactive”, “Lots of online resources/Code examples”,
- “Very practical”, “Real world examples”
- “Passion” of lecturer
- “Useful lab support”

THANK YOU!

What you DISLIKE about the module

- Lots of information in short space of time/Very fast paced
 - Sorry — you should stop me!
 - Subconsciously wanted to make up time for 'audio issues'
- Lack of lab solutions
 - Good idea — not requested before!
 - Some exercises are trying out lecture code with different parameters
 - But yes some exercises could have solutions
- Very Heavy on Audio content, “Rename Multimedia → Audio Processing”
 - But so far only 3 weeks out of 11 have been Audio based, 2 weeks Multimedia/Graphics/Image/Video?
 - Image/Video and Compression algorithms following 6 weeks!
- Time of lectures 9AM Thursday and Friday!!

Suggested Changes to the module

- “Give more lecture to David – more time to explain in depth”
- Make it clear which parts of CM2202 worth revising
 - A few early lectures did this?
- Lab length v allotted time (Two comments)
 - Questions for every topic to assist full understanding and revision
 - Not meant to cover all in lab — **make this clearer?**
 - Independent study time
- Cut down content — allow more detail
 - Breadth v Depth decision
 - What bits require more detail?
- “Go through complicated stuff slower”
 - Just stop me (or Kirill) and ask in lecture.

Any other comments

- “Great Module”
- “Superb Lecture Material”, “Excellent notes” — wow!
- “Lecturer incredibly friendly”!
- “Enjoying so far”
- “Very Challenging” — hopefully in a good way!

THANK YOU!
